

## DIGITAL CORE

# Maximize Your Capabilities with a High-Functioning Digital Core

The harsh reality is this: You won't win in Industry 4.0 with an outdated core system. To digitally transform your manufacturing, maintenance, and supply chain, you must ditch the spreadsheets and cast aside old ways of working.

## Abandon Spreadsheets. Embrace a Common Operational Picture.

Self-compensating supply chains and self-planning, self-healing manufacturing systems are possible. Your competitors are already fast at work building those systems and processes. Our experts will ensure your digital core technologies are up-to-date and embraced by your teams.

Our consultants are SAP experts with decades of experience in leading digital transformation initiatives in manufacturing organizations.

### Implementation

Upgrade to the latest digital core technologies

### Sustainment

Continuously improve your core and inspire your teams to embrace change

### Remediation

Remove customizations and leverage core platform capabilities

## Unlock a World of Industry 4.0 Possibilities

Your digital core is your limiting factor on the road to Industry 4.0. With a strong digital core, you'll make significant advancements in digital manufacturing, digital asset management, and supply chain agility and resilience.

## Get to Industry 4.0 with C5MI

We immerse ourselves in your business and processes to identify root-causes and discover ways to increase end-to-end transparency and collaboration.

### DISCOVER

Your business goals and opportunities for increased value

### DEFINE

High-value opportunities to upgrade your digital core

### DESIGN
