Operationalizing Federal Logistics

We Operationalize IT℠ by converting strategy and technology into mission-ready supply chain capabilities across complex, global operations. Our approach delivers sustained, mission-level performance at scale in any environment.

Company Info & Certifications

CEO: Don Young | **POC:** Garth Sanginiti | (636) 448-4125 | Garth.Sanginiti@C5MI.com | C5MI.com

CAGE: 9ALF5 | **GSA MAS Contract:** 47QTCA23D003B | **Primary NAICS:** 541519 | **DUNS:** 06325802 | **UEI:** M9XWK2TNKWW9

SAP | Google Cloud | UiPath | Tricentis | KINEXON | DEXORY | ZEBRA

Critical Capabilities

Supply Chain Agility & Resilience (SCAR): Continuous Improvement | Long-Term Sustainment | Strategic Implementation | Transformation

Digital Core Services: Competitive Logistics | End-to-End Transparency | Operations Optimization | Synchronization Planning

Program Management: Agile Certified | APEX Methodology | End-User Adoption Leadership | Multi-Site Go-Live Expertise | Structured Playbook Execution

Research and Development: Asset Management | Industry 4.0 | Live Warehouse® | Real-Time Data-Driven Decisions

Contract Vehicles

GSA Schedule
Primary vehicle for civilian agency engagement

JETS 2.0
DLA IT services with small-business recognition

SHIELD IDIQ
Digital engineering support for missile defense

R50
Air Force sustainment with small-business recognition

Significant Customer Successes

Mission outcomes are proven where strategy meets execution at scale. Across federal and commercial environments, C5MI has delivered significant customer successes that translate logistics capability into measurable results across complex, high-consequence, global supply chain operations.

Defense Logistics Agency (DLA)
Warehouse Management System (WMS)

Largest SAP® EWM/TM deployment: 113+ sites, 9,000+ users, 100% go-live success, delivered 7× faster than industry with $40M+ validated ROI.

U.S. Army
Enterprise Resource Planning (ERP)

SAP S/4HANA-based ERP and EAM implementation that improves maintenance predictability and optimizes asset allocation across a North American division.

Blue Bird
Real-Time Location System (RTLS)

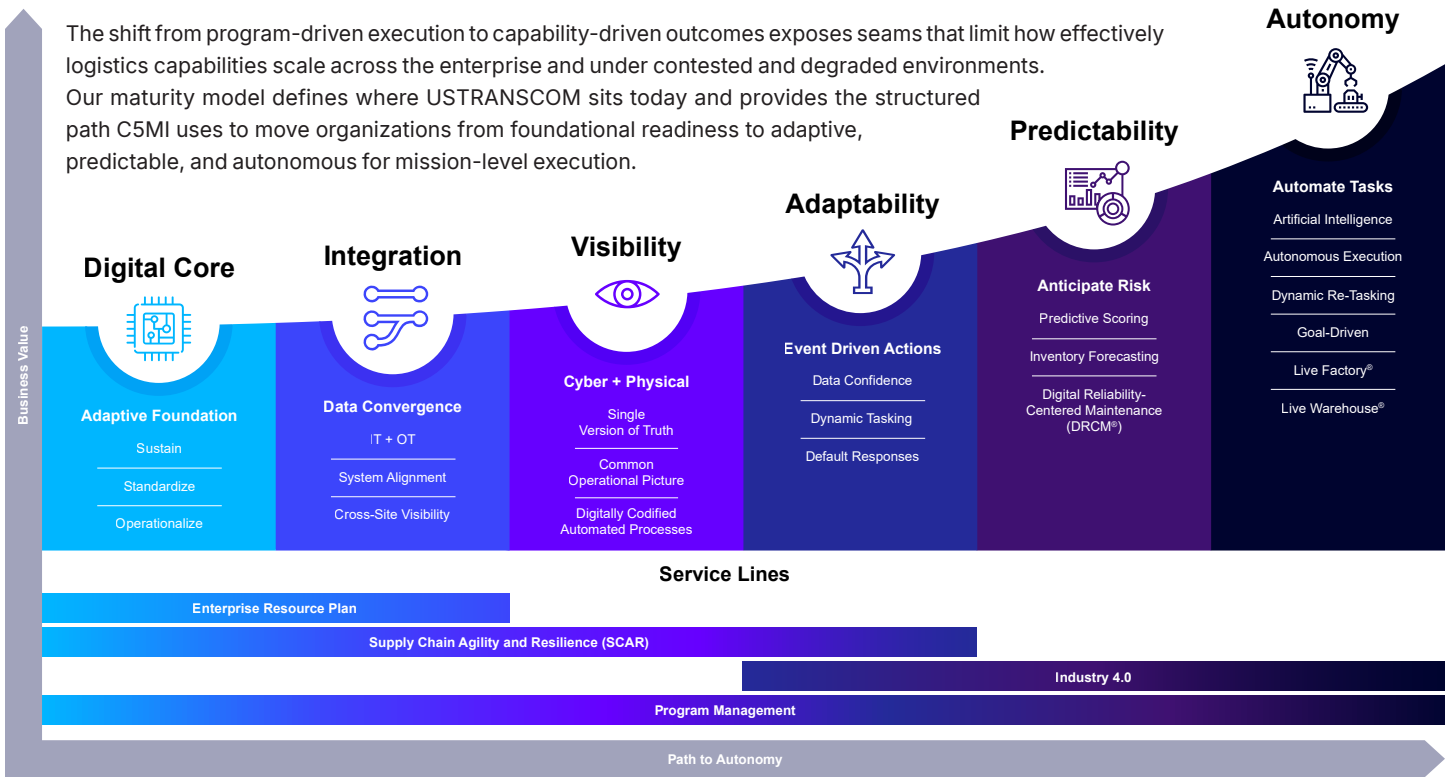
Multi-phase deployment expanding from 49 tracked forklifts in a 960,000-sqft facility to full assembly line visibility, geo-fencing, and ERP integration.

HD Supply
Extended Warehouse Management (EWM)

Enterprise EWM engagement enhancing warehouse execution, system optimization, and fully sustaining operational performance at scale nationwide.

Where Does USTRANSCOM Sit?

The shift from program-driven execution to capability-driven outcomes exposes seams that limit how effectively logistics capabilities scale across the enterprise and under contested and degraded environments. Our maturity model defines where USTRANSCOM sits today and provides the structured path C5MI uses to move organizations from foundational readiness to adaptive, predictable, and autonomous for mission-level execution.



From Maturity to Mission Execution

1. Seam Management at Scale

Disciplined seam management aligns data, platforms, and operations to enable consistent mission execution

2. Maturity-Driven Execution

Readiness scoring sequence transformation reduces risk and accelerates progress up the maturity model

3. Value and Performance Discipline

Measured outcomes ensure logistics capabilities deliver sustained, mission-level performance

4. Dual-Speed Delivery Governance

Unified governance enables rapid capability delivery without sacrificing enterprise stability
