

Operationalizing Federal Logistics

We Operationalize ITSM by converting strategy and technology into mission-ready supply chain capabilities across complex environments. This approach delivers sustained, mission-level performance at scale beyond technical go-live.

Company Info & Certifications

 **CEO:** Don Young
  **POC:** Garth Sanginiti
  (636) 448-4125

 **CAGE:** 9ALF5
  **GSA MAS Contract:** 47QTCA23D003B
  **Primary NAICS:** 541519
  **DUNS:** 06325802
  **UEI:** M9XWK2TNKWW9

Critical Capabilities

- **Digital Core Services:** End-User Adoption Leadership | Multi-Site Go-Live Expertise | Structured Playbook Execution | **Post-Implementation Stabilization & Analytics Adoption**
- **Program Management:** Adaptive Project Excellence (APEX) Project Management (PM) Methodology | Continuous Improvement | Sustainment | Strategic Implementation | Digital Transformation | **Dual Operating System (Bi-Modal Routing for Capability Delivery)**
- **Research and Development:** Industry 4.0 Solutions | Contested Logistics | End-to-End Transparency | Operations Optimization | Synchronization Planning | **Advancing Modeling, Data Fusion, and VAULTIS Data Governance for Unified L-COP**
- **Supply Chain Agility & Resilience (SCAR):** Asset Management | Live Warehouse[®] Experience Center (LWEC) | Real-Time Data-Driven Decisions | **SAP Optimization, Performance Tuning, Advanced Analytics, and Automated Execution at Scale**

Contract Vehicles

Significant Customer Successes

Mission outcomes are proven where strategy meets execution at scale. Across federal and commercial environments, C5MI has delivered significant customer successes that translate logistics capability into measurable results across complex, high-consequence supply chain operations.

Defense Logistics Agency (DLA)
Warehouse Management System (WMS)

Largest SAP[®] EWM/TM deployment: 90+ sites, 9,000+ users, 100% go-live success, delivered 7x faster than industry with \$40M+ validated ROI.

U.S. Army
Enterprise Resource Planning (ERP)

SAP S/4HANA-based ERP and EAM implementation improving maintenance predictability and optimizing asset allocation across a North American division.

Maersk
Enterprise Asset Management (EAM)

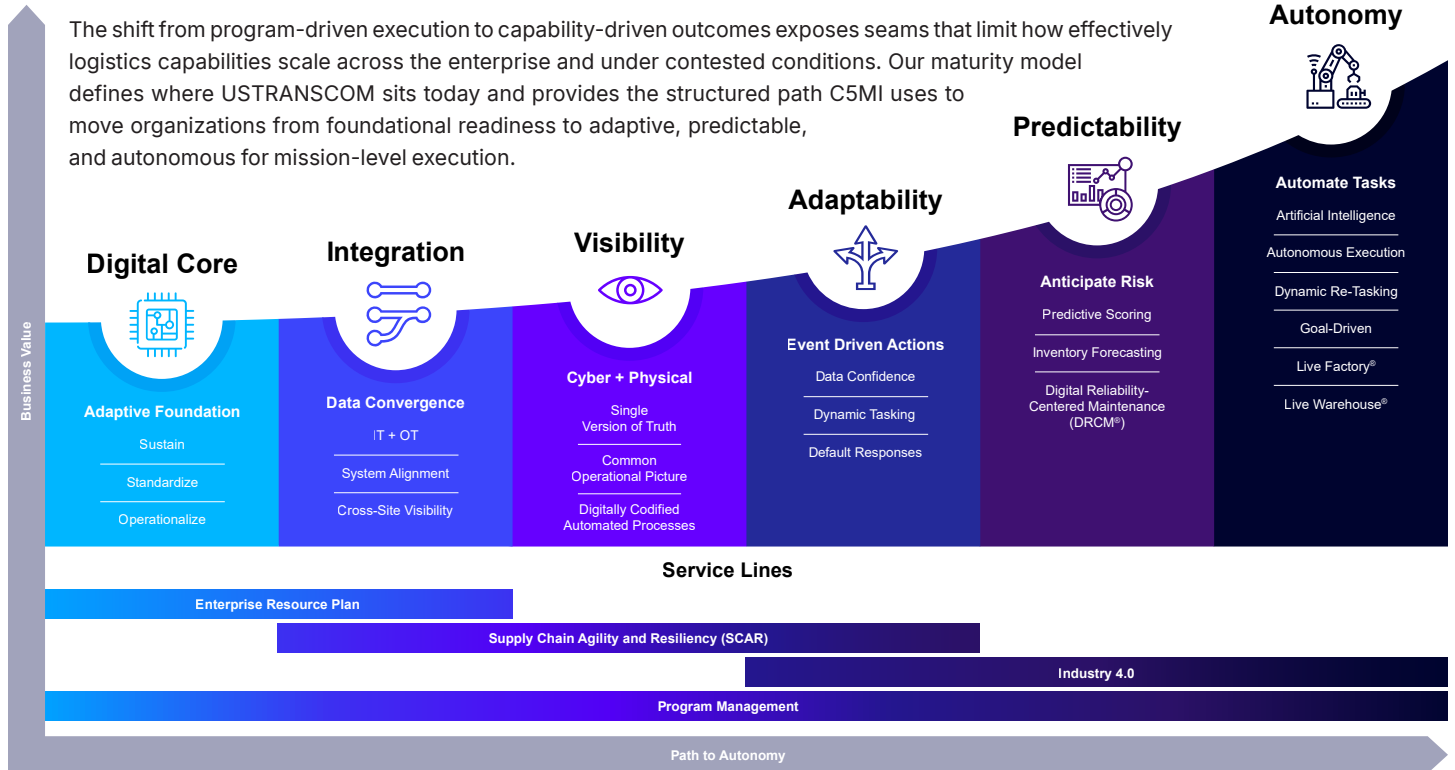

SAP EAM implementation supporting key predictive maintenance, real-time asset visibility, and optimized asset performance across logistics operations.

HD Supply
Extended Warehouse Management (EWM)

Enterprise EWM engagement enhancing warehouse execution, system optimization, and fully sustained operational performance at scale nationwide.

Where Does USTRANSCOM Sit?

From Maturity to Mission Execution

Advancing up the maturity model requires disciplined execution that turns enterprise intent into operational results through 4 key aspects:

- 1. Seam Management at Scale**
 Disciplined seam management aligns data, platforms, and operations to enable consistent mission execution
- 2. Maturity-Driven Execution**
 Readiness scoring sequence transformation reduces risk and accelerates progress up the maturity model
- 3. Value and Performance Discipline**
 Measured outcomes ensure logistics capabilities deliver sustained, mission-level performance
- 4. Dual-Speed Delivery Governance**
 Unified governance enables rapid capability delivery without sacrificing enterprise stability
