

Accelerate Your SAP® S/4 Transformation With C5MI and UiPath®

C5MI, in partnership with UiPath, provides a powerful solution to optimize and expedite SAP S/4HANA® transformations for a more resilient supply chain environment. By leveraging UiPath's cutting edge automation, C5MI guarantees a smooth transition that boosts overall efficiency while consistently minimizing errors across end to end supply chain operations.

Key Benefits

Enhanced Efficiency

UiPath's pre-built workflows automate repetitive tasks, significantly reducing manual effort and increasing operational efficiency.

Error Reduction

Automation minimizes human errors, ensuring data accuracy and compliance with regulatory standards.

Faster Implementation

Leveraging UiPath accelerators, C5MI can expedite the implementation process, reducing downtime and speeding up the transformation journey.

Cost Savings

Automation leads to substantial cost savings by optimizing resource utilization and reducing operational costs.

Core Features

Pre-Built Workflows

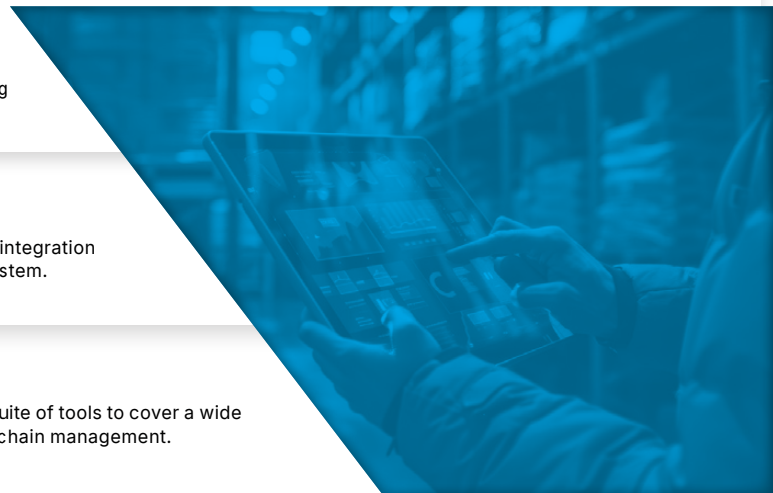

We leverage UiPath's pre-built activities for supply chain processes in SAP S/4HANA, covering order processing, inventory management, and logistics coordination.

Seamless Integration

The accelerators are meticulously designed for both SAP WinGUI automation and native integration via SAP BAPI, ensuring robust, stable, and efficient performance throughout the entire system.

Comprehensive Automation

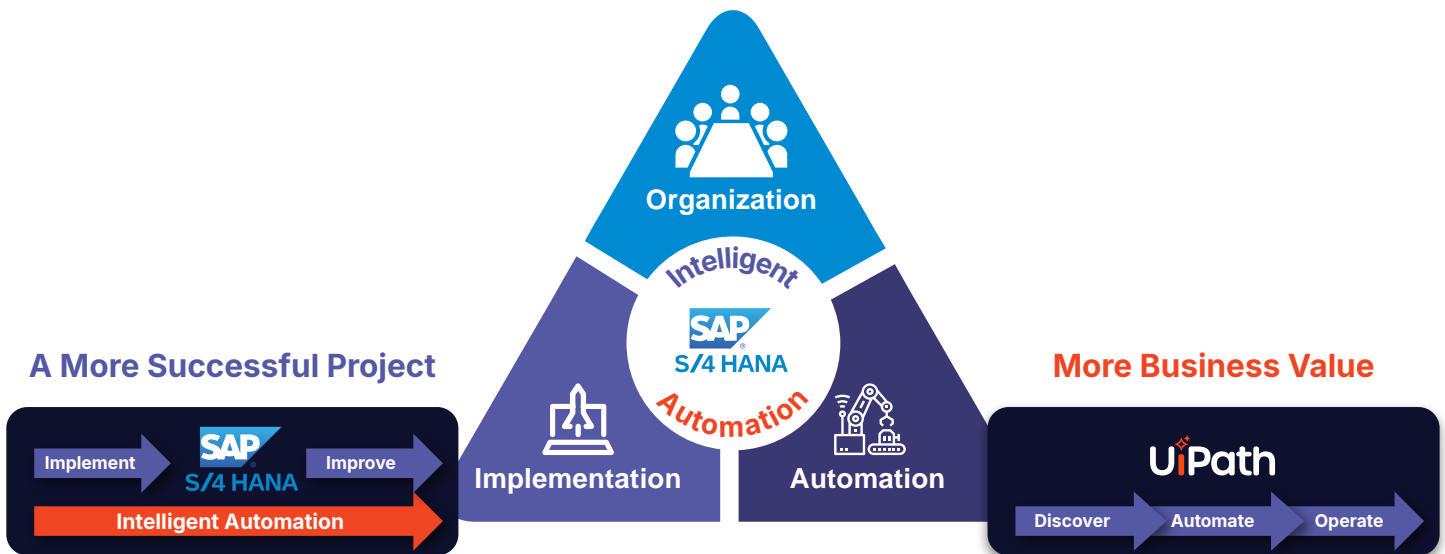

From document understanding to process mining, we leverage UiPath's comprehensive suite of tools to cover a wide range of automation needs, enhancing the overall efficiency and effectiveness of supply chain management.

Successful Intelligent Automation

In the next five years, over 50,000 companies will adopt SAP S/4HANA to enhance their supply chain and ERP operations. By partnering with UiPath, we empower supply chain resiliency by integrating intelligent automation into the S/4HANA platform. The illustration below demonstrates how we utilize this advanced automation technology to significantly boost our customers' efficiency while minimizing errors.

Early & Ongoing Collaboration Between ERP and Automation Teams

Early & Ongoing Automation During Implementation & Beyond

A Platform & Process to Manage the Life-Cycle of a Multitude of Secure Automations

Supply Chain Resiliency

With C5MI and UiPath partnering together, supply chain resiliency becomes more achievable than ever. By leveraging UiPath's automation within the S/4HANA platform, you gain real-time visibility and operational efficiency. This integration empowers businesses to mitigate risks, drive sustainable growth, and secure long-term success.

Risk Mitigation

Identify and resolve potential risks early to ensure swift adaptation to disruptions.

Sustainable Practices

Optimize resource use and reduce your waste, creating efficiency and sustainability.

Long-Term Success

Achieve supply chain success by leveraging automation and real-time data.
