

Digital Core Implementations

Unlock Business Potential With SAP S/4HANA® Cloud

Achieve your ideal Digital Core with C5MI. Our expertise in SAP S/4HANA and the SAP® Digital Core ensures seamless integration and operational excellence, driving your business toward innovation and efficiency.

SAP S/4HANA

As the central hub for all SAP Digital Core offerings, SAP S/4HANA provides a unified platform for real-time business operations and innovation.

- **Centralized Data Management:** Integrate all business processes into a single source of truth, enhancing data accuracy and decision-making.
- **Enhanced Operational Efficiency:** Streamline operations with real-time analytics and predictive insights, increasing productivity.
- **Scalable Solutions:** Adapt to evolving business needs with a flexible and scalable ERP system that grows with your organization.
- **Future-Ready Technology:** Leverage AI, ML, and IoT to stay ahead of the competition and drive continuous improvement.

Digital Core

C5MI's Digital Core offerings include comprehensive solutions such as EWM, TM, DAM, and DM, ensuring seamless operations and efficiency.

- **Extended Warehouse Management (EWM):** Optimize warehouse operations with advanced inventory management and real-time visibility.
- **Transportation Management (TM):** Enhance transportation planning and execution, ensuring timely deliveries and reducing logistics costs.
- **Digital Asset Management (DAM):** Manage your digital assets efficiently, ensuring data integrity and accessibility for better decision-making.
- **Digital Manufacturing (DM):** Streamline your manufacturing processes with enhanced, real-time monitoring and control.

Why C5MI

Hundreds of Years
of combined SAP
experience.

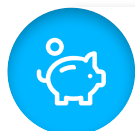

The First and Only
S/4HANA migration
within the DoD.

Custom Solutions
tailored to fit your
specific needs.

Proven Efficiency
in both deployment
and execution.

High Cost Savings
through our proven
optimized operations.

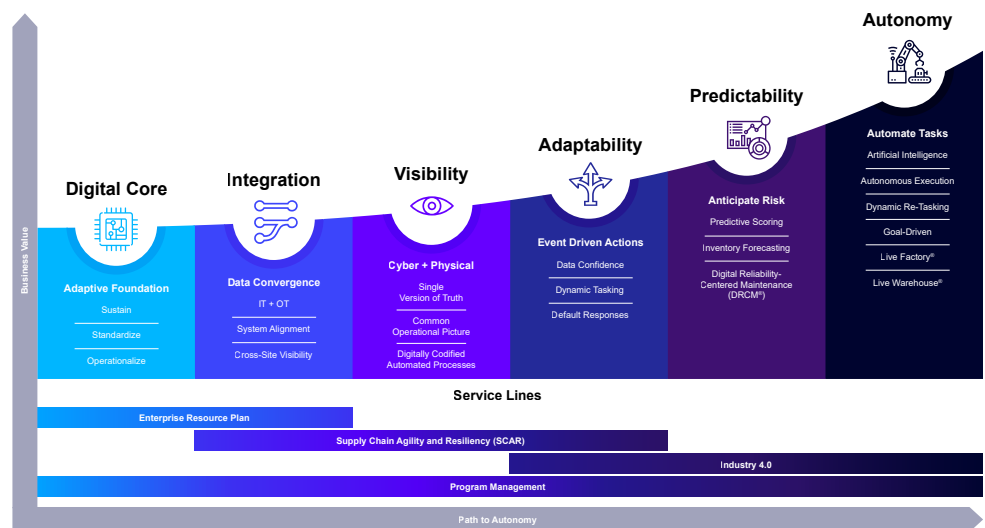

Constant Support
from project start to
overall completion.

Guiding You Through the Maturity Process

C5MI helps organizations modernize legacy warehouse and distribution systems by fully implementing advanced SAP solutions. Our approach integrates key SAP technologies such as Extended Warehouse Management (EWM) and Transportation Management (TM) to create a robust digital core that strengthens supply chain resiliency and drives key results.

We extend this approach with core expertise in global SAP EWM and TM deployments. These projects go beyond implementation—they transform entire logistics operations from end-to-end, delivering efficiency, visibility, and overall adaptability that reinforce key supply chain resiliency and position organizations for long-term success.

Producing Optimal Implementation Outcomes

Proprietary approach to supply chain modernization with expertise in application development, IIoT connected devices, cyber resilience, systems integration, managed services, and data management.

Uncover the Common Operational Picture (COP)

Offers a clear vision on how people, processes, and technology engage in an organization.

IT/OT Convergence

- Critical infrastructure for data processing.
- Integration of applications to the digital core.

- Management of the network of devices.
- Integrating machines and assets on the manufacturing floor.

Tackling Supply Chain Issues With Leading Technology

Supply Chain Challenges

- ❑ Disparate systems with complex integrations.
- ❑ Lack of real-time data insights.
- ❑ Geopolitical events and market volatility.
- ❑ Cybersecurity risks driven by infrastructure gaps.
- ❑ Cost burden from complex regulatory dynamics.
- ❑ Elevated labor and material shortages.

SAP as a Unified Solution

- ✓ SAP Extended Warehouse Management (EWM)
- ✓ SAP Transportation Management (TM).
- ✓ SAP S/4 HANA®.
- ✓ C5MI Digital Asset Management.
- ✓ C5MI Real-Time Location Systems.
- ✓ SAP: Gartner® Leader in WMS & TM for 10+ Years.

C5MI Delivering Outcomes

- 100+ years of supply chain domain expertise.
- 100+ SAP WMS and TM implementations.
- Path to Industry 4.0 Maturity Model framework.
- Increased operational efficiency for clients.
- First to SAP TM solution deployment in DoD.
- Largest SAP EWM deployment in Federal sector.
